CAREER SUMMARY:

Cyber Security Engineer with over a year of hands-on experience in overseeing Security Email Gateways, Vulnerability Management, and Endpoint Detection and Response (EDR) tools. Demonstrated expertise in implementing Vulnerability Management systems, refining email gateway policies, and conducting malware analysis. Skilled in raising security awareness through targeted email campaigns. Seeking to leverage my skills to contribute to robust security strategies and protect against modern cyber threats.

KEY ACHIEVEMENTS:

- **Enhanced Cloud Security**: Elevated the Azure Secure Score from 55% to 80% by improving cloud infrastructure.
- **Reduced Vulnerabilities**: Minimized the organization's total vulnerabilities by 75% within a one-year span.
- **Improved Email Gateway**: Designed and enforced custom security policies using Trend Micro and Sublime Email Security, quarantining 50-65% of malicious emails.
- **Strengthened Employee Awareness**: Lowered employees click rates on phishing emails by 40% by leading security awareness training and phishing simulations.
- **Managed Endpoint Security**: Deployed and monitored SentinelOne EDR, which successfully contained 95% of malware threats.

WORK EXPERIENCE:

Cyber Security Engineer | Classic Fashion Apparel Industry, Jordan

JUNE 2023 - PRESENT

- **Vulnerability Management**: Implemented and managed vulnerability assessment tool - InsightVM. Coordinated with server administrators to prioritize and remediate vulnerabilities.
- **Endpoint Detection & Response (EDR)**: Configured, deployed, and monitored SentinelOne EDR to proactively detect and respond to security incidents. Performed investigations on the created alerts and coordinated with IT Team to mitigate these issues.
- **Security Email Gateway (SEG)**: Created custom security policies based on the type of emails that are being received as well as go through the alerts generated in Trend Micro and Sublime Email Security.
- **Cloud Hardening**: Collaborated with Azure administrators to implement recommendations from Microsoft Defender for Cloud and improve the overall infrastructure by removing unnecessary rules, restricting open ports, and limiting internet access for virtual machines.

- **Security Awareness**: Organized and led phishing simulations and security awareness training sessions for employees to enhance their understanding of cyber threats.
- **Incident Response**: Assisted in incident response by analyzing suspicious files and emails, investigating potential security breaches, and providing remediation steps to mitigate threats.
- **Reporting & Documentation**: Created detailed reports on vulnerabilities, security events, and mitigation efforts, communicating findings and recommendations to stakeholders.

EDUCATION QUALIFICATION:

BTech Computer Science and Engineering

APJ Abdul Kalam University
Mar Baselios College of Engineering and Technology, Trivandrum - Kerala

TOOLS AND TECHNOLOGIES:

- **Endpoint Detection & Response (EDR)**: SentinelOne
- **Vulnerability Management**: InsightVM
- **Security Email Gateway (SEG)**: Trend Micro Email Security, Sublime Email Security
- **Malware Analysis**: AnyRun, VirusTotal
- **Email Security & Diagnostics**: MXToolbox
- **SIEM**: ELK Stack
- **Cloud Security**: Microsoft Defender for Cloud

PROJECTS:

Enhanced Honeyword Generation using Advanced DNA Algorithm

- Created a Password Protection System
- Converts the plain input password text into a combination of DNA bases
- Alerts the admin when an attacker triggers a fake password

CERTIFICATIONS:

- **Introduction to Cybersecurity Tools Cyber Attacks** - Coursera (IBM)
- **Python Data Structures** - Coursera (University of Michigan)
- **Certified Penetration Tester** - RedTeam Hacker Academy
- **Certified Ethical Hacker** - EC Council

SKILLS :

- **Languages**: C Programming, C++, Python
- **Soft Skills**: Analytical Thinking, Problem-solving, Collaboration, Incident Reporting
- **Malware Analysis**: Sandboxing, File Behavioral Analysis
